Summary of Information

Site involves a complex, densely packed group of interlocking structures with connecting ways and winding passages between. Grey, black, white, and especially bright orange and yellow are important colors to the site. Involved with these structures is a number of people gathered together in several groups clustered around tables with things on them. The people seem to be engaged or engrossed in what they are involved with. They are non-US, darker complected, all males, and seem to be somewhat impulsive in personality in general, in that they come easily to conclusions, but don't change their minds easily. They are all dressed differently. Aspects of the site involve a sensation of sudden pressure, again the bright colors, some element of concave and convex. AOLs of the site suggested carbomb builders or electronic circuit assemblers.
